Programming Languages
- Java
- Python
- JavaScript

Libraries and Framework
- Spring Boot
- Node JS
- React
- Django
- Hibernate

Cloud Services
- GCP
- AWS

Data Base
- PostgreSQL
- Oracle DB
- Mongo DB

Tools
- Figma
- Oracle EBS

Oracle EDI
- ANSI X12, EDIFACT
- Mapping, Sterling Interator

EDUCATION

B.E COMPUTER SCIENCE ENGINEERING

Panimalar Engineering College

2020 - 2024

CGPA - 9.09

CERTIFICATIONS

UI/UX DESIGN - GOOGLE

REACT - GOOGLE

BACKEND DEVELOPMENT - MICROSOFT

CLOUD PRACTITIONER - AWS

PROFILE

Dynamic and detail-oriented Full Stack Developer and EDI Analyst with a robust foundation in web development and electronic data interchange. Proficient in developing and maintaining both front-end and back-end applications, and skilled in translating business requirements into technical solutions. Demonstrates a strong ability to learn and adapt quickly, coupled with a commitment to producing high-quality code and fostering seamless data integration. Excels in collaborative environments and is eager to contribute to innovative projects that drive business success.

WORK EXPERIENCE

EDI Analyst
2024 -2024

Johnson Electrics

- Assisted in mapping data between different EDI formats (e.g., X12, EDIFACT) and internal systems, ensuring seamless data translation and accuracy.
- Supported the integration of EDI solutions with ERP systems and participated in the testing and validation of EDI transactions to ensure compliance with business and trading partner requirements.
- Contributed to the documentation of EDI processes and provided training and support to clients, enhancing their ability to manage and utilize EDI systems effectively.

Full Stack Developer
2022 -2023

Sparks Foundation

- Developed and maintained secure, scalable, and high-performance APIs using Java and Spring Boot, ensuring compliance with API design principles and security best practices.
- Implemented user-facing features and reusable components with React.js, optimizing for maximum performance and responsive design across multiple web browsers.
- Collaborated with cross-functional teams, including Product Architects and Managers, to align development efforts with business priorities and deliver innovative solutions.

PROJECTS

Donation App - Payment Gateway Integration
Technologies used : HTML, CSS, JS

- Developed and integrated various payment gateways, such as PayPal, Stripe, and Square, into web applications to facilitate secure and seamless online transactions. This involved handling API calls for payment processing, managing sensitive customer data securely, and ensuring compliance with PCI DSS standards.

Ecommerce Site
Technologies used : HTML, CSS, JS

- An e-commerce site is a digital platform that facilitates online transactions, allowing users to browse, select, and purchase products or services from the comfort of their homes. It combines user-friendly interfaces with secure payment gateways, providing a seamless shopping experience.

Disease Prediction System
Technologies used : HTML, CSS, JS, Django, AIML algorithms

- Developed integrated AI and ML models for disease prediction by analyzing vast datasets, identifying patterns, and providing early detection to improve patient outcomes and enable personalized treatment plans.
